

TEACHER INSTRUCTIONS (or suggestions for use)

1. This can be used as a class starter after bonding has been taught.
2. Cut the formula up and students glue onto the blank template, in correct place.
3. Laminate both the template and formulae. Students then place formulae onto correct place.
 - Have class sets, different coloured card enables easy sorting and care.

SORTING INTERMOLECULAR FORCES

The following molecules exhibit different sorts of intermolecular forces, sort them into the correct boxes below.

Note: the intermolecular forces are all sub-sets of others.

INTERMOLECULAR FORCES

Temporary Dipoles / induced Dipoles

Permanent Dipole-Dipole

H-Bonds
